- Discuss any modifications to data interfaces

## Status Update Since Last Meeting

### Accomplishments:

- Continued working on frontend filtering interface, refactoring client code for new data interface
- Created user accounts in separate collection and performed login authentication

### Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Create user accounts and perform login authentication	Jack	Yes
Refactor client code to accommodate for filtering	Vidith	Yes

## Before The Next Meeting

### Plans:

- Finish filtering functionality, dynamic popups, and start working on star rating interface
- Keep track of each users' testimonial star ratings

### Task Assignments:

Task Description	Assigned to
------------------	-------------

---

Finish filtering functionality on client	Vidith
Finish dynamic popups	Vidith
Change user account database to store testimonial star ratings	Jack

## Minutes from Previous Meeting

We discussed the final product objectives and how we are going to achieve them. We also specified standards for how we are going to pass data related to major functionality in the app (i.e. viewing crime/testimonial data, sending data for creating testimonials/accounts).
