Task Description	Assigned to
Continue working on dropdown functionality, and interactive popup	Vidith
Create schema for 2 database schemas: testimonials and user accounts	Jack

Minutes from Previous Meeting

We started out by giving our updates on connecting to the MongoDB Atlas collection and various frontend features. We decided to not use Bootstrap, and to limit the frontend functionality to interactive markers rather than a full side menu. Since our third teammate dropped the class and sprint 2 is coming to an end, we decided to narrow the scope of the tasks for the next scrum meeting.
